REMARKS.

There were 84 deaths during the month, 1 from small pox, 36 from fever, 8 from bowel-complaints, 1 from accident, 1 from snake bite, and 37 from other causes as detailed in the previous page.

The number of deaths in February 1881, as compared with those of January 1881, are as follows:—

Of East Indians 1 against 1, Musalmáns 20 against 18, Hindus 63 against 65, Native Christians none against 1, being 1 less than the previous month and 11 below the total number of deaths registered in the corresponding month of last year.

Resolution.—Approved.

II. Letter No. 1053—204, dated 1st March 1881, from the Military Assistant to the Chief Commissioner of Mysore, regarding the selection of a suitable site for the purpose of affording increased accommodation for housing the officers and men of the Barr Regiment.

Resolved.—It appears to the Commissioners that the only site available is the locality at present occupied by the chucklers and which is situated immediately to the east of the Roman Catholic Church and in close proximity to the present Barr Sepoy Lines. they would suggest therefore the advisability of steps being taken to obtain possession of this site, and in the event of such an arrangement being carried into effect, ground for the location of the chucklers can be granted by the Municipality near the site known as the old Sappers' Lines.

III. Statement showing the amount of estimated income that will be realized from trade and professional tax as provided for in Sections 56 and 57 of the Bangalore Municipal Regulations of 1871.

Resolved.—That a house-tax shall be levied on all houses of any kind without exception under the provisions of Section 64 of the Bangalore Municipal Regulations of 1871, and that the present mohatarfa tax be revised where necessary, and that all persons now trading or carrying on professions within Town Municipal limits such as sahukars, bankers, lawyers, hotel-keepers, &c., be brought under the operations of the Mohatarfa Rules

J. H. ORR,
President, Town Ml. Comm.

Mysore Govt. Press, Bangalore.—2-5 81.—25.

RESIDENT'S OFFICE.

File No 10 of 1882.

Tax upon Arts, Professions and Trades.

No. 1996, dated. Bangalore, 4th November 1882.

From—Major E. P. Maltby, Municipal President, Civil and Military Station, Bangalore.
To—The Assistant to the Resident in Mysore.

I have the honor to submit the copies of resolutions passed by the Municipal Board at an adjourned meeting held on the 7th ultimo, to discuss proposals submitted by me for increasing the conservancy establishment and levying fresh taxes to meet the proposed increased expenditure, as also a memo drawn up by Mr. R. P. Campbell.

2. These memoranda were printed and circulated to Commissioners and I enclose copies of them as their perusal will save my re-iterating some of the arguments for increasing the conservancy establishment.

3. The proposals were originally brought up at the ordinary meeting in September, but in order that the papers might be printed and further time given for consideration, it was resolved to discuss the question at an adjourned meeting which was accordingly done on the 7th October 1882 when all the Municipal Commissioners' present were agreed as to the absolute necessity of largely increasing the conservancy establishment and my proposals (as contained in my *memo) were accepted with one or two trifling alterations.

4. I may as well point out that the necessity for this large increase is owing to the fact that it is only since I was appointed President that steps have been taken to carry out the daily conservancy of houses. Till then the Municipality was satisfied with cleaning out the public latrines and a few houses inhabited by Europeans, and with sweeping the streets, while no conservancy was attempted in native houses, the people keeping all their night soil &c., in pits in their back yards, and only cleaning out these pits when they got full.

5. Frequent complaints have, in the last 10 years, been made by the Military authorities against this system, but the passive resistance of the people overcame or put aside any attempt at reform till lately.

The number of public latrines has been largely increased during the last $1\frac{1}{2}$ years, and this entails extra expense on the municipality.

6. Now that the municipality is insisting on daily house conservancy a larger establishment is naturally required, and as you are aware the expenditure under the head conservancy has exceeded the budget allotment (drawn on the old lines) so that the time has arrived for re-organizing that establishment.

7. The present inefficient conservancy is, in great part, due to the want of supervision so that the Board purposes to have three Sanitary Inspectors in place of one, as it is utterly impossible for one man to look after the whole station which covers an area of $12\frac{1}{2}$ square miles.

8. It is proposed to place each Inspector in charge of certain localities, and as they will be mounted, they will be able to see that their divisions are properly attended to.

9. The Act, section 13 only provides for 1 Sanitary Inspector, so, if the Resident thinks the appointment of 3 illegal, I would suggest their being dubbed by some other title and appointed under section 15.

10. Another proposal is to increase the number of conservancy districts by forming a new one in the General Bazaar (the most densely populated part) and another one out of the outlying villages north and east of the main part of the station.

For copy of Presidents memo—See appendix.

11. Another proposal is to increase the pay of the overseers who are, at present, (considering the important work they perform) paid inadequately.

12. In modification of my proposal the Board suggests the rates as below:—

1 on Rs. 30 | 2 on Rs. 25 | 2 on Rs. 20 | 2 on Rs. 18 | 4 on Rs. 16.

13. The object of having this large number of classes is to be able to pay men according to the quantity of work they have to perform, the distribution of labor in the various districts being very unequal, while the reason for suggesting one overseer should receive Rs. 30 is that the Board may be in a position to give high pay to some man who has really worked well and so hold out inducement to the others to exert themselves.

14. The other proposals are that the latrines of houses in the European quarters should be conserved at night as also should be the public latrines in the native town. This will of course cost money, but the Board consider that the advantage to be derived warrants the expenditure.

15. By this means the more open parts of the station will be freed in the early morning from that disgusting nuisance, open carts full of reeking latrine sweepings, &c.

16. In the European parts of the town you will see that a staff of sweepers, carts, &c., is provided for removing ashes, rubbish, &c., from houses by day.

17. These houses (garden houses as they are styled) and the roads in which they stand have been carefully divided into 15 blocks with a view to their conservancy and as the same peon, cart sweepers, &c., will always be employed in the same block it can be easily ascertained who is to be held to blame if complaints are made.

18. In the native town it is proposed to employ one set of carts &c., for removing the night soil while another is employed in removing road sweepings, drain filth, &c.

19. The Board resolved to strike off the peon I proposed sending with each cart that went *by night to public latrines* as it was thought that the overseer by looking at them next morning could tell if they had been cleaned out.

20. I must explain that though excrement in the public latrines is to be removed by night, that scavengers are required to work in them by day, in order to keep them clean and to cover over the filth with dry earth.

21. The other proposals consist merely in increasing the number of scavengers and sweepers.

22. A reform much needed is that the present common village carts should be superseded by good iron water tight carts. The municipality has recently had 15 such carts made. but to conserve the station properly 100 more are required.

23. As these carts will cost about 90 rupees each it is proposed to introduce them by degrees, buying say 30 every year.

24. For purposes of comparison I append a table showing the present strength and cost of the conservancy department and that now proposed by the municipality.

25. The time has not yet arrived for thinking of introducing night conservancy into the native town, there is still great difficulty in many parts in getting houses conserved by day.

26. The population of Bangalore (excluding the Military) is 79,192 so that our present staff gives one sweeper or scavenger to every 375 inhabitants while our proposed staff will give two.

27. The total cost of the proposed establishment is Rs. 58,236 to which must be added Rs. 5,360 for contingencies as per statement appended.

28. The allotment in this year's budget is Rs. 28,750, so that Rs. 34,166 has to be provided to meet the cost of what the Municipal Board consider is an adequate establishment for the conservancy of the station.

29. The Municipal Commissioners propose that under section 56 of the Regulations a tax on arts, professions, trades and callings be levied in accordance with the provisions of section 57, and I have the honor to request that if the Resident approves of it, he will apply, as soon as possible, to the Government of India for permission to impose these taxes.

30. You will note that under section 61, the year is to run from 1st January to 31st December and not from 1st April to 31st March, and such being the case it would be advisable in the interests of the rate payers that (if the taxes are levied) sanction should be accorded at an early date so that they may not be required to pay the whole fee for a broken portion of the year.

31. At present the following items from the chief estimates of our receipts in the current years budget.

House tax	35,000
Octroi	45,400
Liquor shops	25,000
Rents of markets &c., ...	6,400
Miscellaneous, such as contracts for slaughter-houses, rubbish contract	8,800

32. The liquor shops already pay the tax under section 58, while the sum received as tax on house property forms a prominent item in the Budget, and the Commissioners do not consider that the tax on house property should be raised, nor do they consider that to impose a tax on carriages and horses would bring in as much money as is required.

33. There therefore remain nothing but to impose a tax on arts, trades, &c., as now proposed, and the Commissioners consider that as the rate of taxation laid down in schedule, C, is low, and that the professions, &c., therein named have virtually till now escaped taxation that the time has now arrived for calling on them to contribute to the upkeep of the station wherein they live and make their income.

34. This letter would have been submitted much earlier, but that it was delayed in order that I might be able to give some idea of what sum the proposed taxes would bring in.

35. By a rough calculation I have concluded that about Rs. 9,000, or, 10,000 will be collected, but the Resident will see that this is mere assumption.

36. I had rough lists prepared and I went through them, rating each party under the schedule according to what he seemed liable to pay.

37. Allowing that the list now prepared is imperfect and that many persons have been passed over I do not anticipate that more than Rs. 15,000 at the outside will be collected, as the wording of the schedule " gross rental of whose shops or places of business is estimated at," will limit the taxation to a great extent. If no more than I anticipate is collected it will be necessary when preparing the Budget to leave out some of the schemes for the better conservancy of the station and do what we can with the money at our command, and if necessary, apply to have the wording of the schedule or the rates altered so as to be able to collect more.

38. Orders were issued to this office that no new taxes were to be introduced into the Budget without sanction being first obtained so that if the sum brought in does not warrant the proposed large increase in our establishment the scheme will be modified when the Budget is submitted.

39. I am now applying for leave to impose these taxes.

40. If the requisite permission is accorded the estimated amount will be entered in the Budget and only such of the new proposals as we can afford will be entered in the Budget, and later on when the tax is being collected after people have registered their trades, &c., and when we shall for the first time really be in a position to say what the new taxes will bring in, we can apply for permission to increase our establishment should it appear we have the funds.

No. 1858—83, dated, Bangalore, the 16th November 1882.

From—Major H. Wylie c. s. I., Assistant to the Resident in Mysore.

To—The President, Municipal Commission, Civil and Military Station of Bangalore.

In reply to your letter No. 1996 dated the 4th instant, I am directed by the Officiating Resident to inform you that application has been made to the Government of India for sanction to the levy of a tax on arts, professions and trades in the Civil and Military Station of Bangalore, under section 57 and schedule C of the Municipal Regulations.

No. 1859—350-5, dated, Bangalore, the 16th November 1882.

From—J. D. Sandford Esq., Officiating Resident in Mysore.

To—The Secretary to the Government of India, Foreign Department, Calcutta.

I have the honor to forward herewith copy of a *letter No. 1996 dated the 4th instant from the President of the Municipality of the Civil and Military Station of Bangalore, submitting, with the approval of the Municipal Commissioners, a scheme for improving the conservancy of the station, and to provide funds for the extra cost involved, recommending the imposition of a tax on arts, professions and trades, as provided in section 57 and schedule C of the Bangalore Municipal Regulations.

* With copies of enclosures.

2. The scheme now submitted is estimated to cost Rs. 63,596, exceeding by Rs. 34,846 the amount provided in the current year's Budget under the head conservancy, which is Rs. 28,750 including the pay of the Sanitary Inspector. The whole of the excess charges under the new scheme will not be met by the proceeds of the tax which is calculated to bring in only Rs. 15,000, and it is therefore proposed that if the levy of the tax be sanctioned, only so much additional expenditure as would be met by the income from the tax will be provided for in the ensuing year's Budget, it being left to the future to increase, if found necessary, the expenditure to the standard proposed in the new scheme, when funds may become available for the purpose.

3. The efficient conservancy of a station like Bangalore being of the utmost importance, Major Maltby, the present President of the Municipal Commission has taken the matter earnestly in hand ever since his appointment to the office, and I desire to support his endeavours to make the work thoroughly efficient. I have therefore the honor to request the sanction of His Excellency the Viceroy and Governor General in Council to the levy of the tax on arts, profession and trades in the Civil and Military Station of Bangalore.

4. As the tax has to be levied from the commencement of the calendar year under section 61 of the Regulations, I beg to be favored with an early reply.

Dated, Calcutta, the 30th January 1883.

From—Lieut-Colonel J. W. Ridgeway, Junior Under-Secretary to the Government of India, Foreign Department.

To—Major H. Wylie, c. s. I, Assistant to the Resident in Mysore.

The Government of India have had under consideration Mr. Sandford's letter No. 1859—350, dated 16th November 1882, and its enclosures, regarding Major Maltby's scheme for improving conservancy in the Bangalore Municipality.

2. There are two points which have presented themselves in going through the papers, and which seem to require some explanation. The first, which has merely come up incidentally, in analysing the taxation of the Municipality, relates to the inclusion of so large a proportion of abkari receipts in its revenue. In the Budget for 1882—83, this item is estimated (Head III.—tax on professions and trades) at 25,000. These receipts would ordinarily form a part of Imperial revenues, and the office cannot trace any thing to show how they came to be credited to Municipal Funds.

3. The second point is the statement made in the last paragraph but two of Major Maltby's printed memorandum dated the 7th September 1882, to the effect that Bangalore is exceptionally lightly taxed. Excluding all sources of income which do not generally come under the designation of taxation proper, the incidence per head of the population still seems to be heavier than that in the great majority of other municipalities, the figures of which have, for purposes of comparison, been consulted. Major Maltby's statement therefore seems hardly correct.

4. Will you kindly write to me demi-officially on these two points as early as you can to enable us to proceed with the consideration of the case.

[DEMI OFFICIAL.]

Dated 24th February 1883

From—Major H. Wylie, C. S. I., Assistant to the Resident in Mysore.

To—Lieut-Col. J. W. Ridgeway, Junior Under-Secy. to the Govt. of India, Foreign Dept.

I have to acknowledge receipt of your demi-official letter, dated the 30th ultimo in which you refer to Mr. Sandford's No. 1859—350, of the 16th November last and its enclosures regarding Major Maltby's scheme for improving conservancy in the Bangalore municipality, and ask for further explanation on two points.

These points are first—the inclusion of so large a proportion of abkari receipts in the municipal revenue; and second—the statement made by Major Maltby in his printed memorandum, dated the 7th September 1882, that Bangalore is exceptionally lightly taxed.

In reply to the first I would point out that the income of 25,000 Rs. mentioned therein is derived from licenses issued to the vendors of liquor in the Civil and Military Station of Bangalore. These license fees ordinarily form part of the Government revenue, but in the case of the Bangalore-Cantonment, they were assigned to the municipality under the orders of the Government of India, Foreign Department, No. 195R., dated 12th August 1872, on the condition that the municipality should bear one-third of the cost of the police. Hence this income is shown as an item of municipal revenue.

I may add that arrack which is distilled in Bangalore is subjected to a still head duty, which is credited to Government, and which amounts to about 2 lacs of rupees.

In the portion of your letter which refers to the second point under reference, you say, that figures which have been consulted show that, per head of the population, the Civil and Military Station of Bangalore is more heavily taxed than the great majority of municipalities. But you give no details to show how this conclusion has been arrived at. The principal sources of municipal income in the Civil and Military Station of Bangalore are :—

(1) An octroi duty on tobacco, betel-leaves, and cocoanuts.
(2) A five per cent tax on houses.
(3) Liquor license fees, consisting of the fees charged under the municipal regulations for the registration of shops selling liquor.
(4) Rents for markets, &c.
(5) Leases of land.
(6) Slaughter house contract, and contracts for rubbish, &c. &c.

The last four descriptions of income cannot be considered direct taxes on the people, as they are paid only by certain individuals or classes of persons, for certain specific privileges accorded to them ; such as the right to sell liquor within municipal limits, the right to remove rubbish, &c.

The first two items alone, viz. octroi and house tax, can be considered direct taxes on the people. The income from these two heads is 45,820+37,145= 82,965 rupees and the total population of the Civil and Military Station of Bangalore according to the latest census is 93,540, so the incidence of direct municipal taxation per head of the population is Rs. 0—14—2.

This incidence in regard to a few other municipalities in India is shown below for the purpose of comparison.

	Population.	Direct taxation.	Incidence per head.
1 Madras	3,97,552 ..	6,71,928 ..	Rs. 1 11 1
2 Hyderabad Assigned District Municipalities (apparently a group of small towns)	89,837 ..	43,991 ..	„ 0 8 4
3 Karachi	68,330 ..	1,83,040 ..	„ 2 10 1
4 Alahabad	1,50,378 ..	1,82,813 ..	„ 1 3 5
5 Poona	90,436 ..	1,54,235 ..	„ 1 11 3
6 Bangalore (C. & M. Station) ..	93,540 ..	82,965 ..	„ 0 14 2

From the above comparison it will be seen that leaving out the Hyderabad assigned district municipalities, Bangalore is the least heavily taxed. I may add that a tax on carriages and animals has been sanctioned by the Government of India, but has not yet been introduced. It is however not calculated to bring in much to the municipality.

Municipality.	Source from which figures are taken	Taxation. Head of taxation	Amount	Total	Population.	Incidence per head of population.

[Demi Official]

Dated, Simla, the 19th May 1883

From—C. Grant, Esq, Secretary to the Government of India, Foreign Department.

To—J. B. Lyall, Esq Resident in Mysore.

If you have time before you go, will you look through the top-papers of this file, confidentially? You will see that it is proposed to increase the municipal taxation of Bangalore for conservancy purposes. I have great doubts not only whether the taxation is not already high enough, but also whether it is not proposed to undertake at the public expense an operation (viz. cleansing of private latrines) which elsewhere people pay for themselves, by means of a special rate on private latrines. You might consider the question when you get down to Bangalore, and in the meantime I would let the question stand over.

NOTE By Mr. J B LYALL.

Foreign Office Note.—For hard up municipality like Bangalore 28,750 per annum sufficient for conservancy; it is about one-sixth of total revenue.

Municipality has just bought 15 water tight carts, say they want 100 more at 90 each, this extravagant. No radical objection to proposed new tax (that on

arts and professions) but there is already octroi, house tax, tax on carriages and horses, so can't see how large class said to have virtually escaped hitherto. Referred to Sanitary Commissioner.

Sanitary Commissioner.—Income of Bangalore already very large to population compared to other towns, and large proportion spent on sanitation. With increase proposed (i. e. to 63,596) more will be spent in Bangalore than in Meerut, Bareilly, Cawnpore and Mirzapur put together, all of which towns separately exceed Bangalore in population, several very largely. People elsewhere keep their own sweepers, and authorities only inspect—must not be in a hurry even for sanitation: people must be educated up to it.

Further Note by Foreign Office.—Not able to find any municipality so heavily taxed as Bangalore. Don't know why Major Maltby talks of taxation as light. The house to house conservancy which the Sanitary Commissioner deprecates, most expensive part of new scheme: will cost 10,308 per annum.

Grant's Note asks for Central Province statistics, where, in some towns, private latrines cleared out by the municipalities, and remarks that special payments for such special clearances perhaps not taxation properly so called; In the C. P. apparently large part of town revenue is payment for such service which is not shown as taxation.

Then followed D. O's to Major Wyllie. Under-Secretary admitted eventually that if Wyllie's figures accepted, Bangalore not heavier taxed than other places (except Bengal), but he argues that Wyllie wrong in excluding 25,000 abkari revenues. Undersigned argues that this abkari tax corresponds with tax or trades on professions in other municipalities which is always shown as direct taxation.

After this Grant says wait for J. B. Lyall.

Appears the abkari was assigned in 1872 on condition of the Municipality bearing one-eighth cost of police.

[Demi Official]

Dated, Bangalore, the 21st August 1883.

From—J. B. Lyall, Esq, Resident in Mysore.

To—C. Grant, Esq., Secretary to the Government of India, Foreign Department.

In our No. 1859-350 dated 16th November last we asked for sanction to the imposition by the municipal committee of the Civil and Military Station of a tax on arts, professions and trades in order to raise funds to meet the cost of improving the conservancy of the station. Some demi official correspondence followed and a few days before I left Simla for Mysore you sent me your office file for perusal with a note in which you remarked that that you had "doubts not only whether the taxation is not already high enough, but also whether it is not proposed to undertake at the public expense an operation (viz cleansing of private latrines) which elsewhere people pay for themselves by means of a special rate on private latrines." You told me to consider the question at Bangalore and said that in the mean time you would let it stand over.

2. After going carefully into the subject I am able to say that I am confident that we were right in saying that the present taxation of the Civil and Military Station is very low. The fees on liquor licenses though levied under section 58 of the municipal regulations, are not of the nature of a special municipal tax as they answer to the liquor shop license fees which are every where levied as excise revenue. Though the imposition of a tax on carriages and horses was sanctioned in your No. 1940 G. G., of 1st November of 1881, it has not been imposed. The majority of the Commissioners are now opposed to it on the ground that it will be difficult to collect, and will yield but a small income.

The only taxes at present imposed are therefore the house tax and the octroi, the former is at the light rate of 5 per cent on annual value and is paid by the owners, the latter is on three articles of luxury only, tobacco, betel leaf and

cocoanuts. The house tax shows a tendency to decline by reductions of valuation on appeal, and the poorest classes contrive to evade the octroi to a considerable extent by buying in markets outside the station and smuggling in what they so buy

In the pettah or native town of Bangalore which adjoins the Civil and Military Station, but is a separate municipality a tax on traders and artisans is levied under the name of *mohtarfa* in addition to house tax and octroi. The imposition of the tax on arts, professions and trades in the Civil and Military Station will therefore, tend to equalize the taxation of the two municipalities. The tax will not go, I think, so low as the *mohtarfa* tax of the pettah does. On the other hand it will take in professional people who escape the *mohtarfa*, I can see no objection to the proposed tax, it will only touch people who can afford to pay and who ought to pay for all that is done in the way of conservancy, road making, water-supply, lighting, &c. I think the Commissioners are right in preferring it to the tax on carriages, carts, horses, and other animals. It will yield much more revenue and be easier of collection.

The other question is whether it is not a mistake for the municipality to undertake to clear out private latrines or if it does so ought not a special rate or cess to be levied from the owners of such private latrines?

On this question also I have come to the conclusion after careful inquiry that the municipality is in the right. The circumstances of Bangalore are peculiar; it was the custom for all native houses except those of the very poorest kind to have a pit in the back yard which was used as a latrine—these pits were only cleaned out at long intervals, and were often close to wells—the owners of the pits generally realized some small sum by selling the deposit when the pits were cleaned out. Under section 107 of the regulations, night soil, &c., have to be removed every 24 hours: this rule has met with much opposition, but it is being gradually enforced. The municipal sweepers who go round with the carts get admission by side doors which have been opened in most of the back yards and remove the filth daily. It would be impolitic at present at all events to insist upon levying a special cess on all houses served in this way. A scavenger cess was tried but was given up because it was found to be very difficult to collect, and to hinder the progress of conservancy. The better class of natives will not give up their customs, and go to the public latrines.

It is to be feared that if you insist upon a special rate they will deny having private latrines, and raise caste objections to inspection of their houses as they do more or less already. Or they will engage to carry away their own night soil, &c., (as they can do under section 106) but in practice will fail to do it properly.

The difficulty experienced in collecting the scavenger cess formerly imposed was due mainly to the following causes. It has to be collected from the occupiers, and in Bangalore a large part of the occupier population is of a very fluctuating character, in the second place the wording of section 108, under which it can be levied is vague, and legal objections were raised, these difficulties might be overcome, but the real reason for not at present insisting upon such a cess is the great advisability of inducing the natives and the poorer Eurasians to accept an improved system of conservancy. I may add that a strict system of conservancy is, I think, more necessary in Bangalore than in most other places. The wells do not generally go down to springs, and are frequently dry. The drinking water comes mainly from tanks, which occupy the lowest positions in the station, and depend upon the rain drainage of the whole area of the station including the streets of the bazaars. Much filth must go into these tanks if an elaborate system of conservancy is not maintained.

It should be understood that the statement submitted with our first letter showing the total cost of the new scheme of conservancy at Rs. 63,596 was merely a kind of maximum estimate drawn up by the President. It was not intended to spend so much at once, or even finally unless experience after gradual increases showed it to be necessary. Much less is being spent at present, and under the heads of peons and sub-inspectors the estimate is I think unnecessarily high, and there is no present intention to work up to it

I think however that in order to complete conservancy arrangements, and make both ends meet it is necessary to secure some increase of revenue. I therefore recommend that the proposed tax be sanctioned. If sanctioned it will not now be brought into force before the beginning of the next financial year. We can manage this year as we have a good balance in hand from last year.

No 2900 I, dated, Simla, the 29th September 1883.

From—The Secretary to the Government of India, Foreign Department
To—The Resident in Mysore.

I am directed to acknowledge the receipt of Mr. Sandford's letter, No. 1859—350, of the 16th November 1882 and enclosures, regarding a scheme proposed by the Municipal Commissioners of the Civil and Military Station of Bangalore for improving the conservancy of the station.

2. It is estimated that the new arrangements when introduced in their entirety will involve an annual cost of Rs. 63,596, exceeding by Rs. 34,846 the amount provided in the Budget for 1882—83 under the head conservancy. In order partly to meet this increased expenditure, it is proposed to impose a tax upon arts, professions and trades or callings, under the provisions of section 57 and schedule C of the Bangalore municipal regulations. It is not anticipated that the proceeds of this tax will exceed 15,000 a year at present, and it is therefore proposed to introduce only so much of the new scheme as can be met from the new source of income increasing the operations by degrees as larger funds become vailable.

3. The Governor-General in Council has carefully considered these proposals which appear to have been thoroughly worked out by the Municipal Commissioners, and unanimously accepted by them, and which have, it is understood, your full concurrence. He agrees in the opinion that improvements in the conservancy of the station are desirable, and considers that the arrangements recommended by the Committee, and described in the enclosures of your predecessor's letter under acknowledgment, are well calculated to improve the sanitary condition of the cantonment. At the same time an examination of the taxation at present devolving upon the rate payers of the municipality appears to show that they will be in no way unduly burdened by the levy of the new tax proposed, especially as it is understood that the Commissioners do not contemplate the present introduction of the tax upon vehicles and animals, sanctioned in this office letter No. 1940 G. G., dated the 1st November 1881.

4. I am accordingly to convey the sanction of the Government of India to the imposition of the tax upon arts, professions and trades, with effect from the commencement of the calendar year 1884
